

Deriving the Unit Circle

The unit circle is a circle on the coordinate plane with a center at _____ and a radius of _____.

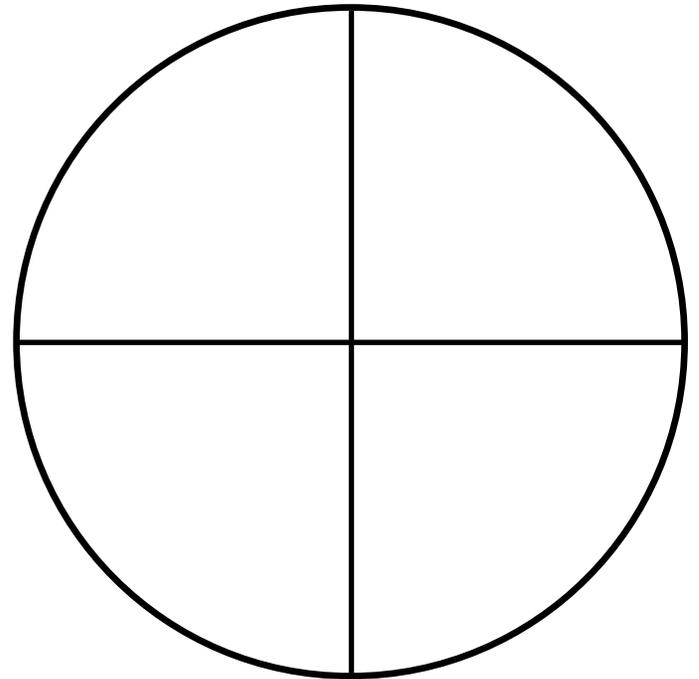

Place 30° reference triangles in each quadrant. Identify the ordered pairs where the triangle intersects the unit circle.

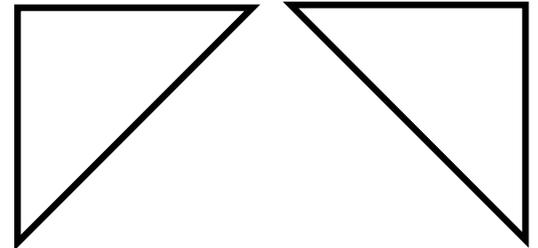

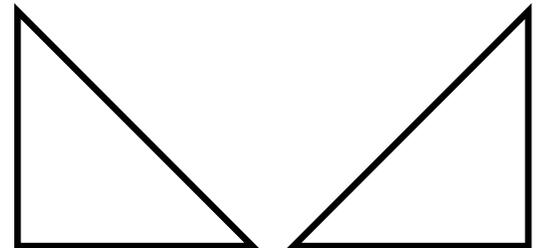

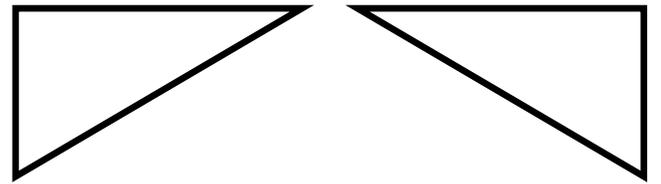

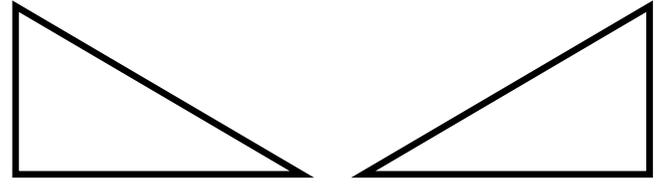

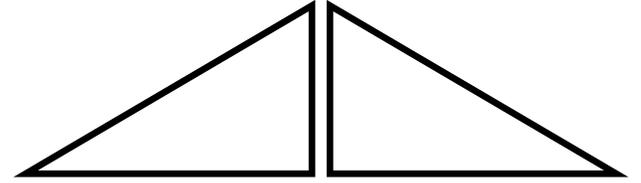

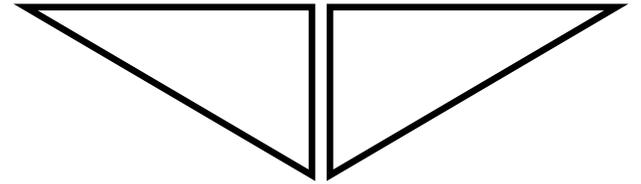

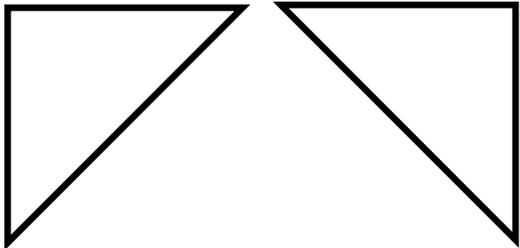

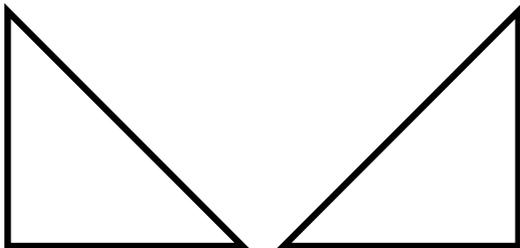

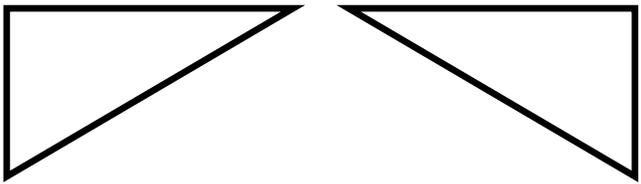

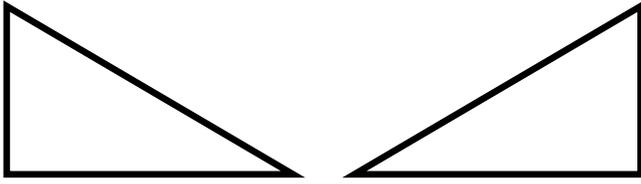

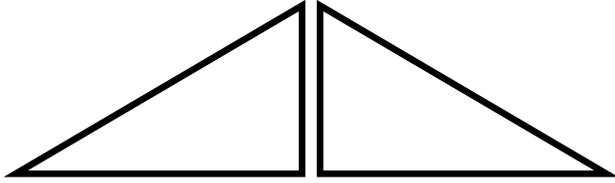

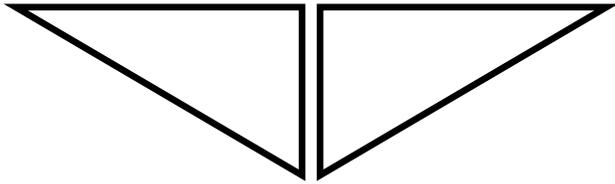

Place 60° reference triangles in each quadrant. Identify the ordered pairs where the triangle intersects the unit circle.

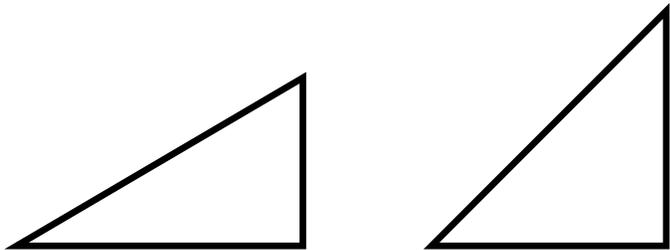

Place 45° reference triangles in each quadrant. Identify the ordered pairs where the triangle intersects the unit circle.
