FINDING THE DISTANCE BETWEEN ANY TWO POINTS ON THE COORDINATE PLANE

1. Plot each point on the coordinate plane.
2. Use these two points to form a right triangle.
3. Apply the Pythagorean Theorem to solve for the hypotenuse.
4. Simplify your answer!

## FINDING THE DISTANCE BETWEEN ANY TWD POINTS ON THE COORDINATE PLANE

1. Plot each point on the coordinate plane.
2. Use these two points to form a right triangle.
3. Apply the Pythagorean Theorem to solve for the hypotenuse.
4. Simplify your answer!

FINDING THE DISTANCE BETWEEN ANY TWO POINTS ON THE COORDINATE PLANE

1. Plot each point on the coordinate plane.
