

Evaluating a Function From a Graph

Snail Speed as a Function of Time

Evaluating a Function From a Graph

Snail Speed as a Function of Time

Evaluate	Meaning
$s(7) = \underline{\hspace{2cm}}$	
$s(6) = \underline{\hspace{2cm}}$	
	After 12 seconds, the snail was traveling at a speed of 8 cm/minute.
$s(11) = \underline{\hspace{2cm}}$	
	After <u> </u> second(s), the snail was traveling at a speed of 7 cm/minute.

Evaluate	Meaning
$s(7) = \underline{\hspace{2cm}}$	
$s(6) = \underline{\hspace{2cm}}$	
	After 12 seconds, the snail was traveling at a speed of 8 cm/minute.
$s(11) = \underline{\hspace{2cm}}$	
	After <u> </u> second(s), the snail was traveling at a speed of 7 cm/minute.
