

# Evaluating Functions Puzzle

Place the integers between -4 and 4 in the missing spaces so each function evaluates properly.

$$f(\square) = \square$$

$$f(x) = \sqrt{x} + \square$$

$$g(\square) = \square$$

$$g(x) = \square x - 5$$

$$h(\square) = \square$$

$$h(x) = 2x + \square$$

-4	-3	-2
-1	0	1
2	3	4

-4	-3	-2
-1	0	1
2	3	4
