

Graphing Linear Inequalities

1. Rearrange the equation into slope-intercept form.

$$2x - 3y < 12$$

2. Use the slope and y-intercept to create a graph.

Slope
Y-Int

3. Determine whether you should use a solid line or broken line.

Solid Line	Broken Line
<input type="checkbox"/>	<input type="checkbox"/>

4. Determine which way the graph should be shaded.
