Radicals

You may add radicals that have the same index and same radicand.

If this is the case, add the coefficients and keep the radicand the same.

You may subtract radicals that have the same index and same radicand.

If this is the case, subtract the coefficients and keep the radicand the same.

You may multiply radicals that have the same index.

If this is the case, multiply the coefficients and multiply the radicands.

Simplify.

You may divide radicals that have the same index.

If this is the case, simplify the coefficients and simplify the radicands.

Rationalize the denominator, if necessary.
