

# PATTERN 30

Five different single-digit whole numbers add up to 30. Multiply those same five numbers together, and the result is 2520.

What are those five numbers? Two of the numbers have already been provided.

$$\square + \square + \square + 1 + 8 = 30$$

$$\square \times \square \times \square \times 1 \times 8 = 2520$$
