

PICKING PUMPKINS

A GAME FOR TWO PLAYERS

On your turn, you may pick any number of pumpkins in a single row or an equal number of pumpkins in both rows.

The player who picks the last pumpkin wins.

Adaptation of Classic Chinese Game Known as 捡石子 *jiǎn shízi* ("Picking Stones")

A mathematical analysis of the game was published by W.A. Wythoff in 1907. It has since been known as Wythoff's Game.

Game was featured as "TSIANSHIDI" in *GAMES Magazine* #9 January/February 1979
