Gettin' Triggy Wit It

Westerville South High School, Westerville, Ohio

On your mark ready set let's go
trigonometry pro I know you know
I go psycho when I see a triangle
just can't sit
gotta get triggy wit it
uhh that's it
three angles, three sides
T-R-I-G all up in my eye
SOH-CAH-TOA will tell you where to go
you just gotta know about H, A, and O
everybody lookin' at it
glance at the box
the H-Y-P
is sittin' across
theta-theta is after eta-eta
pencil on it
it's for the look I don't mark it
the side you ain't touching is the O-P-P
makin' it triggy, we want you to see
yo, what's that last side ya say?
it's gotta be the A-D-J
Gettin' Triggy Wit It

(Chorus 4x)
na na na na na na na nana
na na na na nana
Gettin' Triggy Wit It

What, you want to solve with the trig?

watch your step you might fall

trying to work this gig

Soh Cah-uh Soh Cah-uh, Soh-Cah, Soh-Cah Toa

in the middle of the problem, don't know which one? unh

You gotta know which angles and sides,

that are missin' and given in the problem, they're the guides

you can come with me, all these problems I've tried!

heard it's hard? well then somebody lied

It's SOH CAH TOA

Helps you to study so ya Know-a,

When to use each one

If you got the O n' H-Y-P

SOH lets you know

sine's the way to go

let's say now you got HYP

and the A-D-J,

then cosine's the way

yes yes y'all

but there's one more

you got the legs, (no hypotenuse)

that makes its tan

Gettin' Triggy Wit It

(Chorus)

Roll with me right now, if you need a side

You gotta know two things

O.K. lets ride!

You need an angle and one of the sides

Issue is, where does x reside?

You see it up high

That's how you know to mul-ti-ply

So easy ya get it on your own the first try

Trig to the maximum, I be askin 'em

How bout the one time when ya gotta use da-vis-ion

Only if X is down below,

The X and the angle will switch, ya' know

Last Case

its angle finding time

so let's get it

Trust that theta is the goal get it alone

Calculators will know, when I say go

Take the inverse of the numbers on the right

Hit equals and show it off

Now you got it

Gettin' Triggy Wit It

(Chorus)
